It appears Fairfield County is requiring all easements, including temporaries, that the county takes interest in (recorded in their name) to meet lot split approval through the map room. I am not sure how many surveyors are aware of this and am currently not in the PLSO. Obviously, this requirement can add to the cost of preparation and the county apparently has not been up front about the requirement. I think everyone ought to know this, so they can ask the right questions if they are working on something that will be in favor of the county. Thanks.
